

ANODE IDENTIFICATION CHART

How to identify & specify your anode:

Darglow manufactures and supplies an increasing number of anodes to suit various propeller ranges.

Please follow the simple points opposite in order to identify the correct anode to suit your propeller:

1. Look through this guide to locate the pages containing your 'brand' or make of anode.
2. Measure points 'A' and 'B' to check that the dimensions correspond with those in the table above it's picture - and that they match those of your anode and propeller. NB: Exceptions will be indicated.
3. When contacting Darglow, please specify the 'Type' and 'New code' as detailed in the table, See illustrated example below.
