

## More speed. Less fuel.™

Any marine growth on your boat's running gear will negatively impact your performance. You may see increased fuel consumption, loss of speed, or excessive noise and vibration.

Boat owners and captains the world over have experienced the Propspeed® difference — a long-lasting, ultra-smooth surface that prevents marine fouling, reduces fuel burn and boosts speed!

## Save on operating costs.

Having clean propellers and running gear lowers maintenance costs, reduces corrosion and saves fuel.

*Protects propellers and running gear from marine growth*

*Boosts speed and fuel efficiency, protects against corrosion*

*Nontoxic, with a long service life*

# Propspeed®

## Better Boats, Better Oceans

Dedicated to developing products that make marine craft more efficient and economical to run and maintain. Fouling of running gear is a constant headache for boat owners around the world. Take control with Propspeed, the industry leading foul-release coating. Propspeed is the cost-effective way to keep your marine vessel performing at its peak. Lightspeed is a foul-release coating designed to protect your underwater lights from marine growth. With the Propspeed promise of proven performance, you can trust Lightspeed to protect your lights for 1 – 2 years. Shine brighter, longer, with a lot less hassle. Our foul-release coatings are trusted by boat owners and captains worldwide.

*Boost your performance with the best foul-release system on the market.*

# More speed. Less fuel.™

**Propspeed® is the best foul-release coating on the market.**

Fouling of running gear is a constant headache for boat owners, requiring expensive and time-consuming grinding and sanding to remove marine growth at every haul-out. Take control with PropSpeed—the cost-effective way to keep your marine vessel performing at its peak.

**An effective, long-lasting solution.**

Apply PropSpeed to your running gear using our two-part system: a super-strong etching primer that bonds firmly to the metal substrate, ensuring the coating won't flake, peel or wear away, followed by an ultra-smooth clear coat that creates a slick, nontoxic surface that marine growth can't get a grip on.

**Multi-season, trusted globally.**

Applied and maintained correctly, PropSpeed will protect propellers and running gear from marine growth for 1 – 2 years. Any marine growth that does attach can be easily wiped away while wet using a soft cloth. Thousands of happy boat owners around the world trust PropSpeed to protect their assets and boost their performance.

***“Having clean props and running gear lowers maintenance costs, reduces corrosion and decreases fuel burn.”***

*Use PropSpeed on propellers, rudders, shafts, struts, trim tabs, IPS drives, thrusters, keel coolers or any underwater metal surface.*

*PropSpeed is effective on boats of all sizes and types, both recreational and commercial.*
