20 YEARS OF INNOVATION

FLEXITEEK

2000 to 2020

Dear client,

I come from a family with a long and proud history as seafarers. To start boating and sailing when I was six years old, was therefore only natural to me. I have been a passionate “boat bum” ever since, and power boats and sailing are still important aspects of my life.

When the opportunity arose that I could engage in the newly developed Flexiteek material in the year 2000, it was therefore an engagement that appealed both my mind and to my heart.

Over the past 20 years, we have worked hard to expand, develop new products and add new markets and distributors to our network. With the addition of Wilks, Flexiteek is now clearly the market leader in synthetic teak decking and marine fendering.

Looking forward, I see great opportunities to further develop Flexiteek. We have market leading products; a fantastic network of devoted and passionate distributors and we are winning market share every year. Also, I see that society’s strong focus on ESG over the last years has further increased the demand for our products and services.

I believe the next 20 years will be as exciting as the previous 20 years, and wanted to say a big “Thank You” to all our dear customers.

All the best,

*Anders*

Anders Wilhelmsen

# OUR CLIENTS SAY

*"I want to thank Flexiteek for their support in ensuring both their own and our product is perfect. Their professional approach means they are consistently one of our top suppliers. With no after-sales claims, we are more than happy to be in partnership with Flexiteek."*

---

**Peter Meyer – Head of Purchasing**  
Hanse Yachts

*"We have chosen Flexiteek due to the quality, the realistic look and the outstanding service provided by our supplier. It meets the standard expected on our yachts."*

---

**David Medina – Operation Manager**  
Cantiere del Pardo S.p.A.

*"We are seeing an increasing demand for Flexiteek from our customers and with an easy cooperation and good customer service from our partner, we expect this market to grow for us in the future."*

---

**Kræn B. Nielsen – CEO**  
X Yachts

# TEAK RE-INVENTED

All industries naturally evolve their materials. Car manufacturers moved on from cast iron to aluminium to carbon fiber. The aerospace industry has evolved at great speed from steel to aluminium and 3D printed titanium alloys. And now it's time for the boat industry. Decking has taken progressive leaps in recent years. Longer lasting materials, which are tougher and no longer high maintenance.

**THIS IS FLEXITEEK 2G**

# ENGINEERED TO LAST

## FLEXITEEK STAYS THE COLOR YOU CHOOSE

Flexiteek comes in the same colors to mimic teak, however unlike teak Flexiteek stays the color you choose without the scrubbing and endless maintenance.

But we are not restricted by nature! How about a black plank for your modern RIB or a white plank for your bathroom?

For a full overview of the Flexiteek colors and caulk line color combinations, please visit [flexiteek.com](https://flexiteek.com)

# LIVE A BETTER DAY

## COOLER THAN EVER

***Cools 30% faster than traditional composite decking.***

This 2nd generation synthetic teak decking has, along with improving the heat reflecting properties, also been developed to reduce thermal transfer in hot climates.

Flexiteek 2G cools 30% faster under foot than traditional synthetic decking, allowing you to walk across it barefoot.

## LIGHT WEIGHT

***35% weight saving over rival composite decking systems.***

Flexiteek 2G also offers up to 35% weight saving over rival synthetic decking systems, making it of special interest to owners of performance yachts, multihulls and power boats.

Thickness = 5mm  
Weight = 4.5 kg per m<sup>2</sup>

## BETTER AND GREENER

***The unique look and feel of teak decking but with many added benefits.***

Flexiteek 2G is the biggest innovation in the decking industry in over a decade.

Flexiteek 2G is fully recyclable, made using REACH compliant phthalate free plasticizer. Our manufacturing waste is recycled into other products.

*“We are extremely proud of our innovation, 2G. After over two years of development and six years in use, it outperforms all our expectations.”*

**Rob Tilney - Director**  
Flexiteek Service Centre Ltd

## DECKING FOR BOTH TRADITIONAL AND MODERN BOAT DESIGN

When you order Flexiteek as your decking material we will design it to fit your boat – the way you want it. Just contact your nearest distributor for a quote on your boat type.

Flexiteek is sold by over 100 distributors in 48 countries around the world, providing you with a worldwide support and service network.

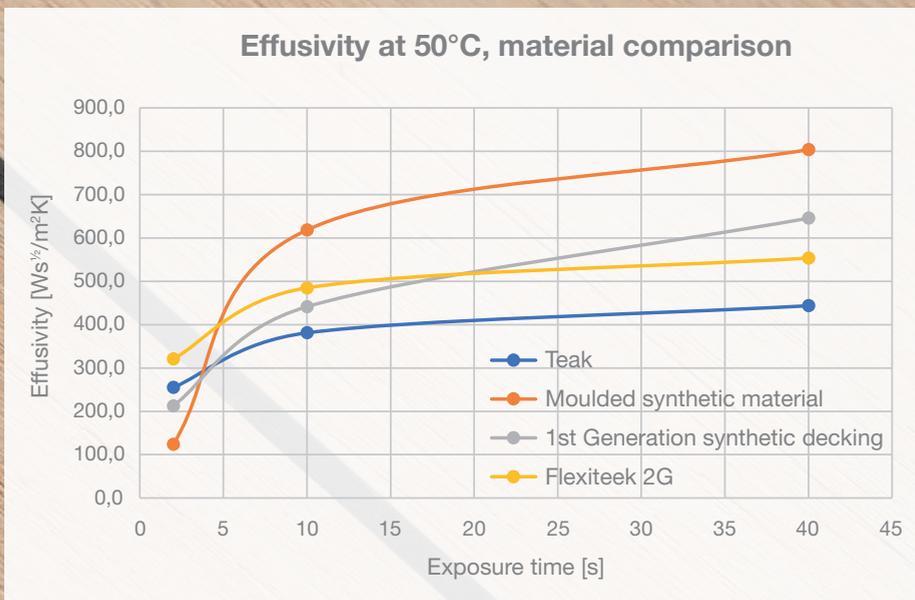

COOLER  
LIGHTER  
BETTER

## TAKE A CLOSER LOOK

It looks like teak but the added advantages are hard to ignore.  
Flexiteek 2G cools 30% faster than first generation synthetics  
and is 35% lighter in weight.

We are an equivalent weight to a 5mm or 6mm thick teak deck!

## CUSTOM MADE BY HAND

We take the art of deck design and manufacture very seriously, after all it showcases our product. All our manufacturers are trained to the highest levels and are highly skilled in their art. Don't be fooled by copies of our product, if it's not a beautifully crafted deck then it's not Flexiteek.

All of our decks are specifically designed for your boat and therefore manufactured to your requirements. We've built decks for the smallest tenders to Super Yachts, we've met the highest standards expected by the owners of these boats.

As the first company to introduce this alternative to traditional decking, Flexiteek will give you a lifetime of satisfaction and the only thing you will need to think about is why you didn't make the change sooner.

### ANTI-SKID PERFORMANCE

Excellent non-slip surface. Wet or dry, Flexiteek provides amazing grip in the toughest conditions.

### LOW MAINTENANCE

Clean with soap and water, or use a high pressure washer.

### TRIMS

Flexiteek trims can be combined with other Flexiteek decking products to provide a perfect finish for that uniform Flexiteek look.

Tenderline Gentleman 34  
with Flexiteek Scrubbed.

## DESIGN

Flexiteek can be designed without boundaries.

## OUR CUSTOMERS

We supply some of the biggest names in boat building with Flexiteek 2G decks. Our customers include: Royal Huisman, Feadship, Gulf Craft, Pardo, Hanse, Moody, Sealine, Sunseeker, Grand Soleil, Williams Jet Tenders, X Yachts, Askeladden, Dehler, Steeler, Sturier Yachts, and Ribeye, to name but a few. We supply over 200 OEMs worldwide!

We are represented in all corners of the globe and have agencies and production units in 48 countries.

We are happy to help with any questions you may have and pride ourselves in excellent quality as well as efficient and friendly service.

## FENDERING PROFILES FOR AN ACTIVE WORLD

You can complement your Flexiteek 2G synthetic teak deck with our Flexiteek Trims range. Made in collaboration with Wilks, the range is designed to provide the ultimate uniform look to your craft. To view the range visit [flexiteek.com](http://flexiteek.com)

Wilks is proud to be one of the world's leading companies in the manufacture and supply of marine fendering. Since 1973 Wilks have supplied a customer base that spans the globe, including many leading boat builders.

Wilks manufactures and supplies a wide range of fendering profiles designed to meet a variety of needs for both boat and pontoon applications.

Their wide range includes both flexible and rigid PVC, stainless steel, aluminium and marine accessories. To view the full Wilks marine fendering range please visit [wilks.co.uk](http://wilks.co.uk)

AI Rubban fitted with ALI 607 and PVC 1065.

Oryx Yachts fitted with PVC 1417R and PVC 1418.

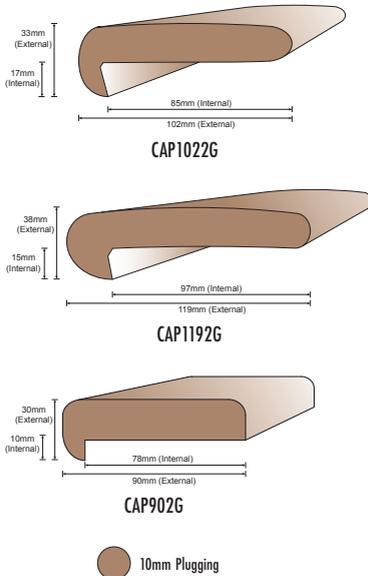

Princess Yachts fitted with PVC 1881R and stainless steel.
