Company Overview

Welcome to Wilks

Since 1973 Wilks has been at the forefront of the UK marine industry in the supply of fendering to the worlds leading marine companies. Whilst directly meeting the needs of boat builders, chandlers and retail customers.

We pride ourselves in stocking a wide range of boat fendering and rub rail profiles to meet the demands of a variety of vessels as well as pontoon fendering specifically designed for use as a dock bumper upon moorings, landings and floating pontoons.

In addition we supply a variety of accessories for profile fitting and installation.

If you are unable to find what you need then please do not hesitate to contact us to discuss your exact requirements. Our in-house tooling facilities ensure that we are able to offer our customers full support from the early stages of product development through to manufacture. We can also extrude custom-made profiles to your specific colour requirements with extremely reasonable order quantities.

In February 2019, Flexiteek International acquired Wilks. Together we aim to provide the highest quality of products to the marine industry.

Chris Berry - Joint Managing Director

PROUD MEMBER OF
BRITISH MARINE
LEADING THE INDUSTRY

Choosing your Fendering

Choosing your Fendering Profile

When choosing a fendering profile, the first thing to consider is whether the profile will be fitted onto a flat or flanged (lipped) surface. The size of the profile can then be generally determined by the space available to work with on the boat as well as the requirements of the fendering.

A working boat will often be fitted with a heavy duty D profile whereas in contrast a day cruiser would feature a profile akin to a rigid PVC/aluminium profile fitted with a PVC insert

All profiles drawings in this brochure are true to size to

allow easy matching of "like for like" profiles, by placing your existing fender onto the profile drawing.

To have your existing profile matched by our sales team, please email us a photo or post us a small sample of your fender using the contact details at the back of this brochure.
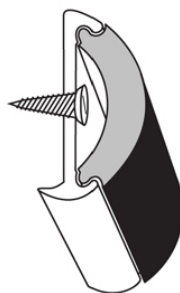

Fittings guides are available on our website for each profile type to assist with both trade and retail installations.

## Identify your Profile

Below are a variety of joins and flanges to help identify potential fendering profiles.

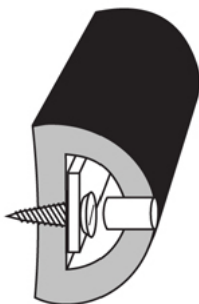

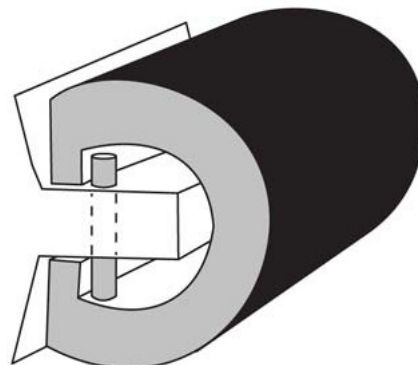

Flat side

Stepped join

Flat flange

Riveted flange

Riveted flange

Material Types

Material Types

We manufacture in a variety of materials which have been carefully selected to provide optimal performance for each profile's designed application.

Each manufactured material is stated in the profile product description.

PVC

Our PVC profiles are extruded in a range of grades (hardnesses) from rigid/01 to soft/50.

Rubber

Extruded from a virgin EPDM based compound, rubber provides excellent resistance to the water, temperature and ozone levels found in the marine environment.

Pre-formed bow and transom bends can be produced on a selection of our rubber profiles, in 1.5m lengths with the angle centrally positioned.

PVC Grades and Descriptions

Rigid - These profiles are denoted with an "R".

/01 - For body/retainers and rigid strips to strengthen softer PVC profiles. Can be fitted around most bows or transoms providing a radius is present.

/15 - A hard yet flexible compound.

/20 - Can be heated proir to fitting to stretch over flanges and tight radiuses.

/45 - Provides the best performance on impact of all grades.

/50 - Soft and flexible and generally does not require pre-heating.
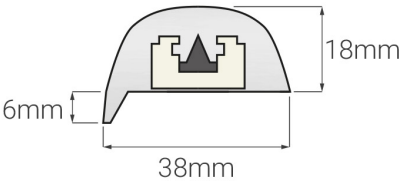

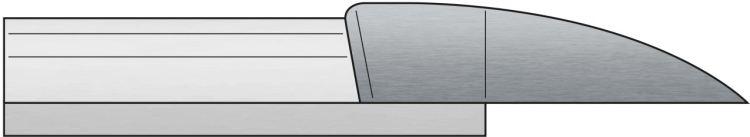

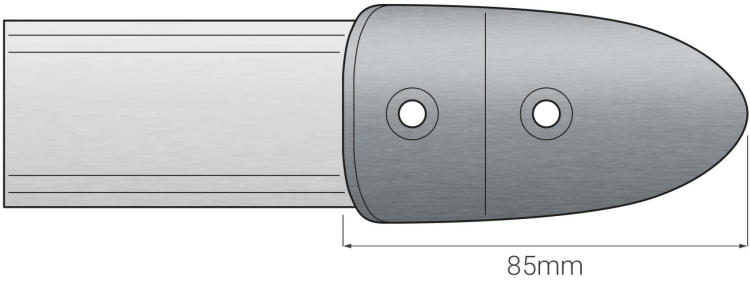

Click

Click

The Click fendering system consists of a rigid PVC track and flexible UV stabilised PVC body to provide a quick fit fendering system with hidden fixings.
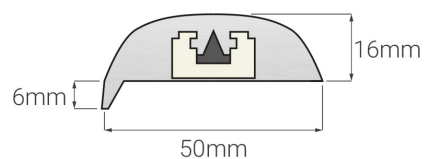

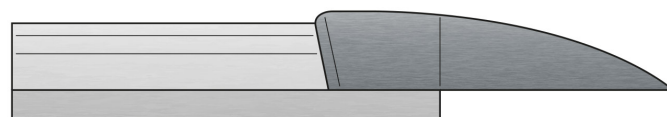

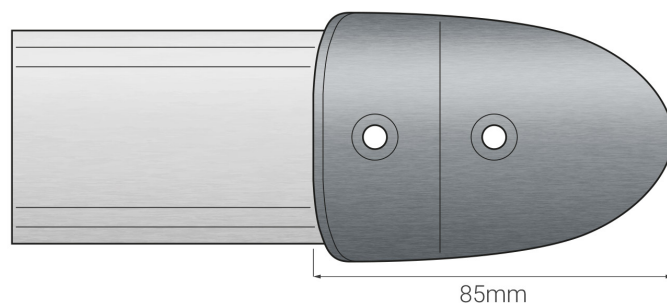

Please note that product drawings on these pages are not true to size.

Rigid PVC with Stainless Steel Inserts

Stainless Steel

Our range of stainless steel inserts have been created to fit matching Rigid PVC fender profiles to achieve a sleek and elegant fendering solution.
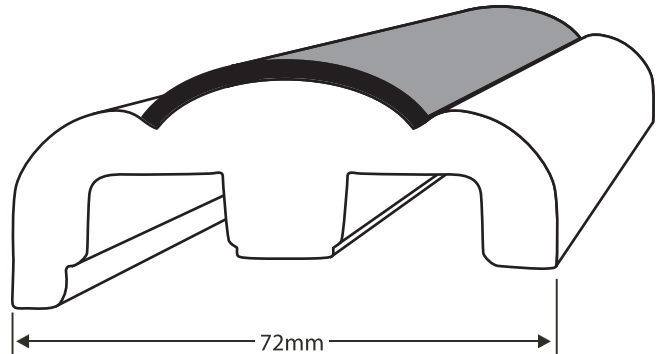

This form of fendering is straightforward to install whilst delivering a simple yet effective finish.

Rigid PVC profiles are also available with PVC inserts.

Aluminium Profiles with PVC Inserts

Aluminium Profiles with PVC Inserts

Our range of aluminium profiles provide a classic boat fendering solution which is simple to install for both the amateur and professional alike.

All of our aluminium boat profiles are supplied polished and anodised, unless otherwise stated. Flexible PVC inserts neatly clip in to the aluminium to offer protection against external surfaces.

D Profiles

D Fender

D fender profiles are a versatile fender option for both vessel and pontoon protection. Designed to meet a variety of both retail and trade needs.

To complete installation fixing strips and PVC cord plugging is available.

BUMP!

BUMP!

Real Protection with Style

Great looking fendering that's quick and easy to fit with no front fastenings.

BUMP! has been developed to provide quick, simple installation without compromise to impact resistance.

Not only easier to fit than traditional D Fender, BUMP! also handles curves and an 80mm radius without the need to mitre either track or body.

BUMP! is available from stock in either a 53mm or 65mm body with a single track size to accommodate both.

BUMP!

BUMP!

Real Protection with Style

Great looking fendering that's quick and easy to fit with no front fastenings.

BUMP! has been developed to provide quick, simple installation without compromise to impact resistance.

Not only easier to fit than traditional D Fender, BUMP! also handles curves and an 80mm radius without the need to mitre either track or body.

BUMP! is available from stock in either a 53mm or 65mm body with a single track size to accommodate both.

Fixing Strips and Cord Plugging

Fixing Strips

Our Rigid PVC Fixing Strips are to be used with our range of B and D fendering profiles.

They are inserted within the profile prior to fitting to provide additional strength and act as a continuous washer. This prevents the fixings from pulling through the flexible body when placed under pressure.

FIXING STRIP SIZES	AVAILABILITY
BUMP! Track	
13 x 3mm Rigid PVC Strip	
15 x 5mm Rigid PVC Strip	
19 x 3mm Rigid PVC Strip	3m stock

50 x 3mm Aluminium Strip	40m min. order
50 x 8mm Rigid PVC Strip	4m stock
75 x 3mm Aluminium Strip	

Cord Plugging

Our PVC cord is used to plug the holes in the face of our D fender profiles following installation.

Manufactured in a UV stabilised, phthalate free, and 100% recyclable compound, our products are as kind to the environment as possible whilst delivering excellent in use performance.
